King of Prussia, PA (March 31, 2009) – BizTech, a leading regional IT services firm and provider of managed services and hosted solutions, announced today that they have begun the auditing process to achieve SAS 70 Type II certification by the end of 2009.

A SAS 70 is an auditing statement issued by the Auditing Standards Board of the AICPA. It is designed to assess the internal controls of a service organization and determine the suitability of the controls to achieve control objectives. A Type II Audit Report ascertains whether the specific controls operate effectively over a period of time.

BizTech's SAS 70 audit will be conducted by an independent Certified Public Accounting firm in accordance with U.S. generally accepted auditing standards and will include an intensive six-month assessment of the effectiveness of BizTech's general controls and procedures. Additionally, the following areas will be evaluated as part of the SAS 70 audit:

- Change Management
- Emergency Change Management
- Customer Contract Process for Managed Services
- Off-Site DBA and other Technical Operations for Managed Services
- Logical Security
- Network Security
- Physical Security
- Environmental Security
- Computer Operations
- Business Continuity and Disaster Recovery

"At BizTech, we have a combination of internal controls and IT infrastructure designed to support the people and processes which are key to our business," said Tom Simkiss, Chief Operating Officer at BizTech. "The SAS 70 Type II Audit provides our customers with the evidence of the controls and procedures in place, which are required to support those procedures and provide the highest and most reliable level of customer service."

**About BizTech**

BizTech is a leading regional IT services firm focused on Oracle applications and technology solutions.
