

**For Immediate Release****BizTech Delivers Oracle Accelerate Solution for Industrial Products and Components**

BizTech to help provide improved operational efficiency and manufacturing optimization with Oracle Accelerate solution for the Industrial Products and Components Industry

King of Prussia, Pennsylvania, August 28, 2007 – Business Technology Services, Inc. (BizTech) today announced that it is launching an Oracle Accelerate solution for Industrial Products and Components, one of the first Oracle Accelerate solutions for the Industrial Manufacturing industry. BizTech is a Certified Advantage Partner in the Oracle® PartnerNetwork.

BizTech's Oracle Accelerate solution for Industrial Products is a pre-configured, industry-tailored solution that will enable manufacturers to benefit from cost-effective, best-practice deployments and rapid implementations. Based on the Oracle E-Business Suite, BizTech's Oracle Accelerate solution incorporates applications critical to manufacturing organizations including discrete manufacturing, financials, order management and procurement.

"The Oracle Accelerate program helps us strengthen our offering for the industrial manufacturing industry. By packaging our own intellectual property and industry expertise with Oracle Applications and Oracle Business Accelerators, we are able to help manufacturing organizations overcome the challenges they face in their day-to-day operations," said Tom Connolly, President of BizTech.

Oracle Accelerate helps reduce the complexity involved in the implementation process. Our consultants can now walk into a client site, and install and configure over a dozen modules for the initial Conference Room Pilot in less than one week. The system should truly be ready for transaction processing and detailed demonstrations, with client-specific data, in the second week of the engagement," adds Connolly.

"In BizTech, we found a partner who understood our unique industry challenges and who also had a long and successful history deploying Oracle Applications. Working with BizTech, our implementation was completed on-time and within our budget – two critical success factors for a company of our size," said Mark Wetzel, Business Applications Manager, Accu-Sort Systems, Inc.

"The Oracle E-Business Suite provides Trion with an end-to-end solution that is flexible, affordable and delivers the manufacturing functionality we need to achieve the standard of excellence we've set for our business since we began in 1947," said Jim Rizzo, Trion 11i Project Manager, Trion Industries, Inc.

"The industry expertise and reach provided by partners like BizTech is critical to Oracle's strategy for putting affordable, industry-specific solutions in the hands of small and medium organizations," said Rauline Ochs, senior vice president, North America Alliances and Channels. "We are fully committed to providing our partners with the support and resources they need to develop their own low cost, high value Oracle Accelerate solutions."

Oracle Accelerate

Oracle Accelerate is Oracle's approach for bringing complete, easy to own, industry-focused applications to small and medium businesses. Key to Oracle Accelerate is the availability of pre-packed application bundles that can be quickly implemented and provide a wide range of industry-specific functionality. Oracle Business Accelerators, the rapid implementation software provided to resellers as part of Oracle Accelerate, enable customers to realize immediate benefit from Oracle Applications. With Oracle Accelerate, customers can take advantage of Oracle's enterprise applications including integrated business flows across front office, back office, and industry-specific processes. Additionally, customers benefit from automated upgrades, significantly reducing the complexity and risk associated with migrating to updated versions.

About Oracle PartnerNetwork

Oracle PartnerNetwork is a global business network of more than 19,000 companies who deliver innovative software solutions based on Oracle software. Through access to Oracle's premier products, education, technical services, marketing, and sales support, the Oracle PartnerNetwork program provides partners with the resources they need to be successful in today's global economy. Oracle partners are able to offer their customers leading-edge solutions backed by Oracle's position as the world's largest enterprise software company. <http://oraclepartnernetwork.oracle.com>
